

# TABLE OF CONTENTS

## Volume 1

	Page No
Preface .....	iii
Sponsors Details .....	ixx
<b>FIRE INVESTIGATION</b>	
The ammonium nitrate explosion at West, Texas: A disaster that could have been avoided <i>Vytenis Babrauskas, Fire Science and Technology Inc., USA</i> .....	1
Ignition and burning characteristics of tea light candles and their influence on fire investigation <i>Mike Burroughs, Fire Investigations, UK</i> .....	13
<b>HEAT FLUX MEASUREMENTS &amp; CALCULATIONS</b>	
Measuring heat flux from a fire to a surface using IR Thermography <i>Christian Rippe, B Lattimer, Jensen Hughes, USA</i> .....	25
A study on radiation screens – A comparison between experiments and different numerical models <i>Jonathan Wahlqvist, M Runefors, P van Hees, Lund University, Sweden</i> .....	37
Resolving obstructed views using multiple thermography digital image correlation systems <i>Jonathan Hodges, P Summers, S Case, N Cholewa, Virginia Tech, C Rippe, B Lattimer, Jensen Hughes, USA and Z Mathys, Defence Science &amp; Tech Org, A Mouritz, RMIT University, Australia</i> .....	47
A comparison of radiative transfer models in fireFoam and FDS <i>Marcus Runefors, J Wahlqvist, B Husted, Lund University, J Anderson, C Huang, SP Technical Research Inst, Sweden</i> .....	59
<b>PYROLYSIS MODELLING</b>	
A generalized methodology to produce pyrolysis models for composite materials <i>Mark McKinnon, Jensen Hughes / University of Maryland, S Stolarov, University of Maryland, USA</i> .....	71
Burn: A 3D model of burning materials <i>Morgan Bruns, NIST, USA</i> .....	83
A model for thermal decomposition of solids out of Ellingham assumption <i>Aurélien Thiry, P Carlotti, LCPP, P Boulet, Université de Lorraine, France</i> .....	95
Distributed reactivity model to predict multi-stage pyrolysis of polymeric materials and sensitivity analysis <i>Abhishek Bhargava, Danish Inst of Fire and Security Tech, Denmark / Lund University, Sweden, P van Hees, B Andersson, H Sina, S Iyengar, Lund University, Sweden</i> .....	107
Application of fire simulation within the railway industry <i>Fabian Bränström, Bombardier Transportation, Germany</i> .....	119

Pyrolysis modelling of composite fabrics based on individual fabric properties using micro-combustion calorimetry <i>Konrad Wilkens Flecknoe-Brown, Lund University, Sweden / Danish Inst of Fire and Security Tech, Denmark, S Hostikka, Aalto University, Finland and P van Hees, Lund University, Sweden</i> .....	131
Pyrolysis model properties of engineered wood products and validation using transient heating scenarios <i>Gaurav Agarwal, M Chaos, Y Wang, FM Global, USA and D Zeinali, Ghent University, Belgium</i> .....	143
Power law modelling of simple pyrolysis kinetics <i>Pierre Carlotti, A Thiry, S Dupont, LCPP, P Boulet, Université de Lorraine, France</i> .....	155
<b>FLAME RETARDANTS &amp; COATINGS</b>	
Are commercially successful, halogen-free back-coatings for textile furnishings possible within the shorter term? <i>Richard Horrocks, S Eivazi, B Kandola, University of Bolton, UK</i> .....	167
From the synthesis to the understanding: How to design flame retardants for PBT <i>Sophie Duquesne, R Duprez, G Fontaine, S Bourbigot, ENSCL, France, S Wagner, A Koenig, R Kramer, M Klatt, BASF, Germany</i> .....	179
Gas-phase interactions of phosphorus retardants with diffusion flames <i>Fumiaki Takahashi, Case Western Reserve University, V Katta, Innovative Scientific Solutions, G Linteris, V Babushok, NIST, USA</i> .....	191
Chemically modified lignin as flame retardant for acrylonitrile-butadiene-styrene (ABS) <i>Benjamin Prieur, G Fontaine, S Bourbigot, ENSCL, M Wittemann, R Klein, Fraunhofer Inst for Structural Durability and System Reliability LBF, Germany</i> .....	203
Numerical prediction on interacting thermal-structural behaviour of inorganic intumescent coating <i>Sungwook Kang, S Choi, University of Ulster, UK and J Yoon Choi, Korea Conformity Laboratories, Korea</i> .....	213
Intumescence paint systems exposed to different heating scenarios <i>Robert Jansson McNamee, SP Technical Research, Sweden and K Storesund, R Stølen, P Gunnar Nordløkken, SP Fire Research, Norway</i> .....	225
<b>FURNITURE FLAMMABILITY</b>	
Study: Reduced ignition propensity (RIP) cigarettes – Theory and reality <i>Ida Larsson, A Bergstrand, SP Technical Research Institute, Sweden</i> .....	235
Cone calorimeter studies of foam and fabric assemblies <i>Alexander Morgan, University of Dayton, USA</i> .....	247
Upholstered furniture - Can fire behaviour be improved without adding chemical flame retardants? <i>Anne Steen-Hansen, K Storesund, SP Fire Research, Norway and A Bergstrand, SP Fire Research, Sweden</i> .....	257
Analysis of heat release rate of bed mattress installed at different heights <i>Jong-Jin Jeong, M Mizuno, Y Ohmiya, Y-C Shin, Tokyo University of Science, Japan, K-W Park, FILK, Korea and M Delichatios, University of Ulster, UK</i> .....	269

## LARGE OUTDOOR FIRES

- Firebrand ignition in large outdoor fires: The use of full-scale experiments to guide the development of laboratory standard test methods  
*Samuel Manzello, NIST, USA and S Suzuki, NRIFD, Japan* ..... 281

- Experimental investigation of wood decking assemblies attacked by firebrand showers  
*Sayaka Suzuki, NRIFD, Japan and S Manzello, NIST, USA* ..... 293

- Computationally efficient wildland fire spread models  
*Alan Lattimer, J Borggaard, S Gugercin, K Luxbacher, Virginia Tech, B Lattimer, Jensen Hughes, USA* ..... 305

## FIRE SERVICE & BUILDING FIRE SAFETY

- Humanoid firefighting robot for structure fires  
*Brian Lattimer, Jensen Hughes, J Starr, J McNeil, C Nogales, J Peterson, J Ziglar, J Burnton, C Knabe, Y Sung, J Seminatore, R Griffin, J Newton, V Orekhov, M Rouleau, M Hopkins, Virginia Tech, D Hong, UCLA, D Lee, University of Pennsylvania, J Farley, Naval Research Lab, USA* ..... 317

- Techniques for the offensive exterior attack in fighting ventilation controlled structure fires  
*Rijk van den Dikkenberg, K Groenewegen-Ter Morsche, R Weewer, Fire Service Academy, Netherlands* ..... 329

- Robot autonomous fire location using a weighted probability algorithm  
*Chris Nogales, T Furukawa, Virginia Tech, B Lattimer, Jensen Hughes, USA* ..... 341

- An analysis of residential building fire rescues: The difference between fatal and non-fatal casualties  
*Rijk van den Dikkenberg, M Kobes, Fire Service Academy, Netherlands* ..... 353

- How can fatal fires involving vulnerable people be avoided?  
*Karolina Storesund, A Steen-Hansen, C Sesseng, SP Fire Research, G Gjøsund, K Halvorsen, P Grytten Almklov, NTNU Social Research, Norway* ..... 365

- Towards a sound understanding of the effectiveness of smoke detectors in dwellings  
*Karin Groenewegen-Ter Morsche, M Kobes, K Dangermond, Fire Service Academy, Netherlands* ..... 375

## DETECTION & SUPPRESSION

- Investigation of the use of smoke detectors in Norwegian dwellings  
*Christian Sesseng, N K Reitan, SP Fire Research, Norway* ..... 387

- Smoke behavior analysis with multi-view smoke spread data  
*Florian Vandecasteele, B Merci, S Verstockt, Ghent University, Belgium* ..... 399

- The extinguishing performance of experimental siloxane-based AFFF  
*Ralf Hetzer, F Kümmelen, Bundeswehr Research Inst for Protective Technologies and NBC-Protection, Germany* ..... 409

- Smoke layer/water spray interaction – Thermal and radiative characterization  
*Elizabeth Blanchard, S Renard, P Fromy, CSTB, G Parent, P Boulet, Université de Lorraine / CNRS, D Borgiallo, PROFOG, France* ..... 421

- Efficiency of water spray system for smoke cooling in confined and mechanically ventilated compartment  
*Hugues Pretrel, L Audouin, IRSN, France* ..... 431

Experimental and numerical modeling of interactions between sprinklers and natural smoke vents <i>Nicolas Trevisan, Université de Lorraine / CNRS / CNPP, Z Acem, P Boulet, CNRS, G Pianet, A Jenft, A Breton, A Muller, CNPP, France</i> .....	443
--	-----

Optimization of in-rack automatic sprinkler protection using a coupled modeling-testing approach <i>Karl Meredith, K Jamison, J de Vries, Y Wang, S Dorofeev, FM Global, USA</i> .....	455
---	-----

Cost benefit analysis for sprinklers in tall buildings above 30m for life safety <i>Corinne Williams, J Fraser-Mitchell, BRE Global, UK</i> .....	467
--	-----

## **POSTERS**

### **POSTER SESSION A**

#### **TRANSPORTATION**

Fire spread over the Sedan type passenger cars with the emphasis on the origin and cause of the fire <i>Lucie Hasalová, O Šafránek, V Vystrčil, Technical Institute of Fire Protection in Prague, M Jahoda, University of Chemistry and Technology Prague, Czech Republic</i> .....	479
--	-----

B-LAYERS: The role of each layer in systemic fire protection of buses <i>Virginia Alonso, G Rein, Imperial College London, UK</i> .....	485
--	-----

Heat release and lethal combustion product evaluation of rail coach materials <i>B Nageshwar Rao, R Arunjothi, Central Power Research Institute, India</i> .....	487
---	-----

#### **HEAT FLUX MEASUREMENTS & CALCULATIONS**

An assessment of the Weighted-Sum-Of-Grey-Gases approach in fire simulations <i>Ivan Sikic, J Wen, University of Warwick, S Dembele, Kingston University London, UK</i> .....	495
--	-----

Spatial distribution of thermal radiation – Verification of the finite volume method <i>Piotr Tofilo, R Porowski, The Main School of Fire Service, W Wegrzyński, Building Research Inst, Poland</i> .....	497
--	-----

Comparison of experiments and numerical simulations of a high pressure water mist curtain as a radiation shield <i>Bjarne Husted, Lund University, Sweden, J Ho, ARUP, UK and D Martin, Jensen Hughes, USA</i> .....	505
---	-----

Mapping of incident radiation with plate thermometers from a propane flame - Free and adjacent to walls <i>Ulf Wickström, O Lind, P Troedson, Luleå University of Technology, Sweden</i> .....	511
---	-----

'Heat Flux' is an ill-suited boundary condition in fire safety engineering. Adiabatic surface temperature is better <i>Ulf Wickstrom, Luleå University of Technology, Sweden</i> .....	517
---	-----

#### **PYROLYSIS**

An experimental study for the radiant heat reduction effect about the Low-E coating glass in fire <i>Kazuyuki Suzuki, T Hisada, Nippon Sheet Glass Co Ltd, Y Ohmiya, Tokyo University of Science, Japan</i> .....	523
--	-----

A contribution to pyrolysis modeling <i>Corinna Trettin, F-W Wittbecker, R Goertz, University of Wuppertal, L Arnold, Research Centre Jülich GmbH, Germany</i> .....	529
---	-----

Mathematical modeling of highly-filled halogen-free cable compound burning in cone calorimeter <i>Mikhail Shuvalov, M Kamenskiy, A Kryuchkov, T Stepanova, A Frik, D Savin, VNIIKP, Russia</i> .....	535
---	-----

## **COMPARTMENT FIRE TESTING & MODELING**

Application of Monte-Carlo propagation methods for uncertainty assessment of large scale fire tests outputs <i>Hugues Prétrel, P Querre, IRSN, France</i> .....	541
--	-----

Assessment of the thermal properties of insulation materials <i>Nicole Nagy, M DiDomizio, E Weckman, University of Waterloo, Canada</i> .....	547
--	-----

Burning rate and time to flashover in wooden ¼ scale compartments as a function of fuel moisture content <i>Arjen Kraaijveld, A Gunnarshaug, B Schei, T Log, Stord/Haugesund University College, Norway</i> .....	553
--	-----

Study on mechanism of fire spread between rooms - Simple temperature prediction model for two rooms <i>Yi-Chul Shin, Y-H Yoo, Korea Institute of Civil Engineering and Building Technology, K-W Park, Fire Insurers Laboratoties, Korea and Y Ohmiya, Tokyo University of Science, K Tashima, Tokyo Fire Department, K Himoto, Building Research Inst, Japan</i> .....	559
---	-----

## **FIRE SERVICE**

Incidents and accidents at interior firefighting in Sweden 2002-2014 <i>Stefan Särdqvist, A Jonsson, Swedish Civil Contingencies Agency, J Nordström, Rescue Service of Östra Götaland, Sweden</i> .....	565
---	-----

## **WATER-BASED FIRE SUPPRESSION**

Delay of wood ignition owing to attenuation of radiation by water <i>Masaki Noaki, A Saito, T Sato, S Hayashi, T Akieda, Y Ohmiya, Tokyo University of Science, Japan and M Delichatsios, Ulster University, UK</i> .....	571
--	-----

Simulation of water based suppression of pre-mixed methane-air fire and explosion in long striaght duct <i>Jafar Zanganeh, B Pitkin, M Shirzaei, J Zanganeh, B Moghtaderi, Univeristy of Newcastle, Australia</i> .....	577
--	-----

## **VISIBILITY THROUGH SMOKE**

Effect of acute yaw angles with sight line on visibility of emergency sign through fire smoke <i>Kosuke Fujii, National Research Institute of Fire and Disaster, T Sano, Waseda University, Y Ohmiya, Tokyo University of Science, Japan</i> .....	583
---	-----

Visibility of emergency signs derived from numerical smoke spread simulation <i>Volker Schneider, R Könnecke, IST GmbH, Germany</i> .....	589
--	-----

## **POSTER SESSION B**

### **MODEL VALIDATION**

BRE Global office fire 2014: A comparison of experimental and CFD modelling data from a fire in a full scale section of an open plan office  
*Connor McIntosh, N Cole, BRE Global, UK*.....595

A tridimensional numerical study of the FLUMILOG warehouse fire experiment  
*Shihab Rahman, B Truchot, INERIS, France* .....601

### **TESTING**

Influence of different ignitors used in single smoke chamber on smoke and gas measurements  
*Koichi Yoshida, Yokohama National University, K Araya, T Fukaya, JECTEC, H Yoshioka, NILIM, T Hayakawa, TSV, Japan*.....607

Use of LED for measuring smoke density in fire tests as potential alternative to halogen lamp  
*Hideki Yoshioka, NILIM, T Hayakawa, Tokyo System Vac, K Yoshida, Yokohama National University, T Noguchi, University of Tokyo, Y Hase, Mitsubishi Plastics, Japan*.....611

Study on gas sampling probe in cone calorimeter  
*Jungmin Choi, Fire Insurers Labs, Korea and E Guillaume, Efectoris Group, France* .....617

### **FIRE RESISTANCE & FAÇADES**

Behaviour of cavity barriers in modular houses – A revised test methodology  
*Daniel Brandon, A Just, R Jansson McNamee, SP Technical Research Inst, Sweden* .....623

Does UK guidance on small service penetrations prejudice the performance of fire rated floor constructions?  
*Bill Hay, I Sanderson, Glasgow Caledonian University, UK*.....629

Design goals - Fire resistance demands for tall residential buildings  
*Danny Hopkin, A Ballantyne, E O'Loughlin, B McColl, Trenton Fire Ltd, UK* .....635

Qualitative assessment of the fire hazards beneath bridges  
*Panagiotis Kotsovinos, G Flint, G Walker, B Lane, Arup, UK*.....641

Resistance to jet fires of passive protection materials: Numerical evaluation of thermal loads  
*Virginie Dréan, R Chiva, H Leborgne, G Auguin, Efectoris, France* .....647

Experimental assessment of repeatability in façade fire testing  
*Johan Anderson, L Boström, R Jansson, SP Technical Research Inst, Sweden and B Milovanović, University of Zagreb, Croatia* .....653

Principles of testing and regulating fire safety of façades  
*Miroslav Smolka, B Messerschmidt, Rockwool International, Denmark, L Boström, SP, Sweden, T Crimi, A C Consulting Solutions Inc, V Dowling, Fire Science and Tech, Australia, K-W Park, Fire Insurers Labs of Korea, South Korea and H Yoshioka, NILIM, Japan* .....659

### **FIRE RISK**

Fire risk assessment with a Stochastic Approach – Model development and application to an auditorium  
*Samia Haouari Harrak, CSTB / LEMTA, P Fromy, E Blanchard, CSTB, P Boulet, R Mehaddi, LEMTA, France* .....665

Development of a fire risk index to evaluate fire safety in Taiwanese small scale hospitals <i>Chia Lung Wu, University of Edinburgh, UK and WW Tseng, Central Police University, Taiwan</i> .....	671
---	-----

A probabilistic and time dependant approach to external fire spread and building separation distances <i>Sung-Han Koo, BRE Global, UK</i> .....	677
--	-----

Quantitative risk assessments for existing rail tunnels – Explicitly calculating the consequences for every occupant in every scenario <i>Andrew Addinsell, F Gamon, Arup, Australia</i> .....	683
---	-----

## **FIRE SAFETY ENGINEERING**

Fire Engineering Platform - A new concept of calculation tool package designed for fire science education and engineering <i>Piotr Tofilo, The Main School of Fire Service, Poland</i> .....	689
---	-----

How successfully ventilate the underground garages dedicated for cars powerd by LPG – Evaluation on real scale tests and computer modelling <i>Dorota Brzezińska, Lodz University of Technology, Poland</i> .....	697
--	-----

Smoke and heat extraction in underground stations <i>Lukas Arnold, B Schröder, A Meunders, S Schmidt, Jülich Supercomputing Centre, Germany</i> .....	703
--	-----

Study on smoke behavior in the station underpass <i>Susumu Mafune, O Suzuki, East Japan Railway Company, D Sato, Y Ohmiya, Tokyo University of Science, Japan</i> .....	709
--	-----

## **POSTER SESSION C**

### **FIRE DYNAMICS**

Experimental and numerical investigation of downward smoldering combustion in paper stacks <i>Alberto Tinaburri, F Ponziani, V Ricci, Ministry of the Interior, Italy and M Angelino, University of Loughborough, UK</i> .....	715
---	-----

Influence of duct geometry on flame propagation for flammable gas-air mixtures <i>Mohammadreza Shirzaei, J Zanganeh, S Kundu, B Pitkin, B Moghtaderi, University of Newcastle, Australia</i> .....	721
---	-----

Influence of initial ignition source on flame front velocity of a methane/coal dust explosion in a smooth detonation tube <i>Mohammed Ajrash, J Zanganeh, B Moghtaderi, University of Newcastle, Australia</i> .....	727
---	-----

Prediction of flammability limit of a thin solid material in microgravity environments <i>Shuhei Takahashi, K Tsuboi, K Maruta, Gifu University, Japan</i> .....	733
---	-----

Temperature attenuation above a fire source with a simple harmonic oscillation in horizontal direction <i>Yasushi Oka, M Iizuka, Yokohama National University, H Oka, National Maritime Research Inst, Japan</i> .....	739
---	-----

Study on ignitability of cellulose based materials <i>Jadwiga Fangrat, Instytut Techniki Budowlenej, Poland</i> .....	745
--	-----

## **COMPOSITES**

Improving fire safety of glass fibre reinforced polymers for bridge infrastructures <i>John Gales, C Gaudreault, Carleton University, N Nagy, E Weckman, University of Waterloo, Canada and H Smith, University of Edinburgh, UK</i>	747
---	-----

## **ELECTRICAL FIRES**

Understanding the limits of thermal runaway in lithium-ion battery systems <i>John Hewson, Sandia National Labs, USA</i>	753
---	-----

Fire ignition and spread analysis on photovoltaic building roofs <i>Piergiacomo Cancelliere, V Puccia, M Caciolai, Ministry of Interior, Italy</i>	761
---	-----

## **HUMAN BEHAVIOUR**

Evacuation dynamics under consideration of vulnerable pedestrian groups <i>Paul Geoerg, A Hofmann, BAM, A Pulm, Werkstatt Lebenshilfe i Berg Land, Germany</i>	769
---	-----

Design for elderly egress in fire situations <i>Lauren Folk, J Gales, Carleton University, S Gwynne, NRCC, Canada and M Kinsey, Arup, China</i>	775
--	-----

Affordance-based evaluation of signage design for areas of refuge <i>Elisabetta Carattin, Arup Fire, UK, R Lovreglio, Politecnico di Bari, Italy and E Ronchi, D Nilsson, Lund University, Sweden</i>	781
--	-----

Evacuation concept of a high rise Ministry building - Findings four years after completion <i>Michael Haas, DGMR Consulting Engineers, The Netherlands</i>	787
---	-----

Characteristics of evacuation behavior based on observation of a theater evacuation drill <i>Tomonori Sano, M Imanishi, Y Hatakeyama, Waseda University, Japan</i>	793
---	-----

Experimental study of the crowd flow affected by straight corridor and with a bottleneck <i>Akihide Jo, Takenaka Corporation, T Sano, Waseda University, Y Ohmiya, Tokyo University of Science, Japan</i>	799
--	-----

Field observations and experiments on the evacuation of children with disabilities in the buildings with their mass stay <i>Sergey Slyusarev, D Samoshin, State Fire Academy of EMERCOM, Russia and P Anh, The University of Fire Fighting &amp; Prevention, Vietnam</i>	805
---	-----

Validation of pre-movement time distribution for evacuation modelling using real data from evacuation drill <i>Giordana Gai, E Cartapati, Sapienza University of Rome, P Cancelliere, F Alaimo Ponziani, M Mazzaro, M Caciolai, D De Bartolomeo, Ministry of Interior, Italian National Fire Brigades and Services, Italy</i>	811
--	-----

Validation study on the use of evacuation models for simulation of long ascending stair evacuation <i>Caroline Eriksson Lantz, J Norén, Briab Brand &amp; Riskingenjörerna AB, M Delin, DeBrand Sverige AB, E Ronchi, Lund University, Sweden</i>	817
--	-----

Evacuation modelling in the fire safety industry: Quo Vadimus? <i>Rodrigo Machado Tavares, EXOVA Warringtonfire, UK</i>	823
--	-----

An emergency egress model based on a macroscopic continuous approach <i>Thomas Gasparotto, A Collin, P Boulet, LEMTA, G Pianet, A Muller, CNPP, France</i>	829
---	-----

## **AUTHOR INDEX**

## Volume 2

	Page No
Preface .....	iii
Sponsors Details .....	ix
<b>PREDICTIONS OF SOOT GENERATION &amp; VISIBILITY</b>	
A numerical investigation on the impact of modeling aerosol behaviors on the prediction of soot density in a compartment fire <i>Jason Floyd, Jensen Hughes, USA</i> .....	835
Experimental and numerical analysis of the influence of the soot yield when conducting CFD analysis for the estimation of the available safe evacuation time <i>Gabriele Vigne, JVVA Fire and Risk / University of Jaén, Spain and W Węgrzyński, ITB, Poland</i> .....	847
Full-scale fire tests to obtain optical density data for validation of compartment fire models <i>Jason Huczak, M Janssens, SwRI, S Turner, Leidos, USA and K Onaka, TEPCO, Japan</i> .....	859
Model uncertainty of predictions of the soot concentration in the hot gas layer of compartments fires <i>Marc Janssens, J Huczak, SwRI, S Turner, Leidos, USA and K Onaka, TEPCO, Japan</i> .....	871
<b>RACK STORAGE FIRE MODELLING &amp; TESTING</b>	
The impact of object shape on rack storage fire simulations <i>Charles Fleischmann, University of Canterbury, New Zealand</i> .....	881
An experimental study on the freeburn characteristics of complex fuels <i>Sai Thumuluru, Y Xin, A Gupta, FM Global, USA</i> .....	891
Complex fuel experiments using the Characteristic Fuel Unit (CFU) method for cartoned commodities <i>Yibing Xin, Y Wang, M Chaos, S Dorofeev, FM Global, USA</i> .....	903
Modeling of large-scale fires in cartoned plastic commodity rack-storage <i>Ankur Gupta, G Agarwal, K Meredith, S Thumuluru, Y Xin, M Chaos, Y Wang, FM Global, USA</i> .....	915
<b>MODEL VALIDATION</b>	
Novel full-scale atrium fire experiments and numerical validation under steady and transient venting conditions <i>P Ayala, TYPUSA / Universidad Pontificia Comillas, A Cantizano, Universidad Pontificia Comillas, G Vigne, JVVA Fire Safety Consultants, C Gutiérrez-Montes, Universidad de Jaen, Spain and G Rein, Imperial College London, UK</i> .....	927
Comparison of partially lined timber room experiments with the modified B-RISK flame spread capability <i>Harriet Peel, M Spearpoint, University of Canterbury, C Wade, BRANZ, New Zealand</i> .....	937
Temperature measurements and modelling of flashed over compartment fires <i>Ulf Wickström, A Byström, Luleå University of Technology, J Sjöström, SP Fire Research, Sweden</i> .....	949

## FIRE TESTING

A buoyancy driven fire calorimeter  
*James Quintiere, University of Maryland, R Lyon, S Crowley, FAA, USA* ..... 961

Electronic gas sensors in fire testing  
*Matthew DiDomizio, E Weckman, University of Waterloo, Canada and N Ryder, University of Waterloo, Canada / Fire & Risk Alliance, USA* ..... 969

Combustion products of polymers at constant fuel/oxygen ratios  
*Richard Walters, L Speitel, R Lyon FAA, USA* ..... 981

Development of a dynamic shrinkage/collapse measurement method for cellular polymer foams  
*Karlis Livkiss, DBI, Denmark and P van Hees, Lund University, Sweden* ..... 991

## FIRE RESISTANCE

Temperature assessment of a vertical member subjected to localized fire  
*Christophe Thauvoye, B Zhao, CITICM, France and F Hanus, O Vassart, ArcelorMittal Global R&D, Luxembourg* ..... 1003

Design at the interface – Developing a structural fire strategy for an exposed weathering steel frame  
*Danny Hopkin, E O'Loughlin, B McColl, S Anastasov, Trenton Fire Ltd, D Illingworth, AKT II, UK* ..... 1015

Post fire guidance for the critical temperature of prestressing steel  
*Lucie Robertson, David Narro Associates, UK and J Gales, Carleton Univ, Canada* ..... 1027

A conceptual framework for a design travelling fire for large compartments with fire resistant islands  
*Xu Dai, J Maclean, S Welch, BRE Centre for Fire Safety Eng, University of Edinburgh and L Jiang, A Usmani, Brunel University, UK* ..... 1039

Mechanical properties of gypsum plasterboard exposed to standard fires  
*Blanca Andres, DBI, Denmark / Lund University, Sweden and P van Hees, Lund University, Sweden* ..... 1051

Behaviour of char layer in fire-damaged box section timber beams  
*Hailey Quiquero, J Gales, G Hadjisophocleous, Carleton University, Canada* ..... 1063

Development of a thermomechanical model on behaviour of cellulose based material under fire resistance test  
*Guillaume Cueff, V Drean, G Auguin, Efectoris France, J-C Mindegua, D Breyses, University of Bordeaux, France* ..... 1075

Full-scale fire test of CLT structure used for student housing  
*Kristian Hox, G Baker, SP Fire Research, Norway* ..... 1087

## FAÇADES

Fire safety of façades  
*Anja Hofmann, BAM, Germany* ..... 1095

Development of the advanced technical method and the test standard for the purpose of the fire safety of façade materials in buildings  
*Kye-Won Park, Fire Insurers Labs of Korea, Y-H Yoo, KICT, South Korea, M Smolka, Rockwool Int, Denmark, L Boström, SP, Sweden and H Yoshioka, Nat Inst for Land and Infrastructure Management, Japan* ..... 1103

Modeling of fire exposure in façade fire testing <i>Johan Anderson, L Boström, R Jansson, SP Technical Research Inst, Sweden and B Milovanović, University of Zagreb, Croatia</i> .....	1115
A full-scale fire test to investigate the fire behaviour of the "ventilated façade" system <i>Dionysios Kolaitis, National Technical University Athens / Greek Fire Academy, E Asimakopoulou, M Founti, Greek Fire Academy, Greece</i> .....	1127
Determination of fire performance of ventilated façade systems on combustible insulation using LEPIR2. Extended applications approach based on multiscale tests <i>Roy Weghorst, Kingspan Insulation Ltd, UK and B Heuzé, LNE, E Guillaume, Efectoris, France</i> .....	1139
Fire safety of façades with polystyrene foam insulation <i>Anja Hofmann, S Kaudelka, BAM, Germany</i> .....	1151
Protection against external fire spread – Horizontal projections or spandrels? <i>Markus Nilsson, A Mossberg, Brandskyddslaget, B Husted, Lund University, J Anderson, SP Technical Research Inst of Sweden, Sweden</i> .....	1163
<b>CODES AND REGULATIONS</b>	
Codes and standards development in the USA: How does it work? <i>Marcelo Hirschler, GBH International, USA</i> .....	1175
Comparing national fire regulations in EU for 3 different buildings <i>Birgitte Messerschmidt, S Hughes, J Albiac, Fire Safe Europe, Belgium</i> .....	1187
Compartment sizes, resistance to fire and fire safety – Construction details <i>Tom Lennon, BRE Global, UK</i> .....	1197
Fire statistics: What is the current situation and what can be expected? <i>Dominique Parisse, PlasticsEurope, Belgium</i> .....	1205
<b>FIRE RISK</b>	
Effects of performance of active fire protection systems on life risks due to fire in a mid-rise residential building <i>George Hadjisophocleous, X Zhang, Carleton University, J Mehaffey, CHM Fire Consultants Ltd, Canada</i> .....	1217
Efficient method for probabilistic fire safety engineering <i>Ruben Van Coile, WSP, UK / Ghent University, Belgium and G Balomenos, M Pandey, University of Waterloo, Canada</i> .....	1229
Standardized probabilistic model for allowable fire compartment size <i>Peter van de Lier, DGMR, K Jan de Boer, C Cieraad, Antea Group / Consulting Group Save, The Netherlands</i> .....	1241
Maximum fire compartment sizes <i>Jeremy Fraser-Mitchell, T Lennon, BRE Global, UK</i> .....	1253
<b>FIRE SAFETY ENGINEERING</b>	
Uncertainties in relationships used in smoke management engineering <i>El Mehdi Koutaiba, Université d'Aix-Marseille / CSTB, O Vauquelin, Université d'Aix-Marseille, E Blanchard, P Fromy, CSTB, France</i> .....	1265

Make-up air effects on the smoke interface height in atrium fires <i>Amir Rafinazari, G Hadjisophocleous, Carleton University, Canada</i> .....	1277
Comparison between experimental tests and computer models of a smoke-proof enclosure safety vestibule <i>Fabio Alaimo Ponziani, P Cancelliere, A Tinaburri, D De Bartolomeo, M Mazzaro, M Caciolai, Ministry of Interior, Italian National Fire Services, G Gai, E Cartapati, Sapienza University of Rome, Italy</i> .....	1289
Development and validation of a method to validate extensions of performance of fire resisting cable wraps subjected to non-standard fire conditions <i>Daniel Joyeux, A Blanguernon, EFECTIS France, B Gautier, EDF, B Marquez, T Cerosky, NUVIA Protection, France</i> .....	1297
Fire spread and tenability in single family dwellings: Combining live fire experiments and FSE-modeling <i>Lieuwe de Witte, H Hazebroek, R Weewer, Fire Service Academy, The Netherlands</i> .....	1309
What we recently learned about performance based design <i>Bill Koffel, Koffel Associates, USA</i> .....	1321
The role of quantitative risk analysis models in performance-based fire safety engineering <i>Greg Baker, SP Fire Research, Norway, M Spearpoint, C Fleischmann, University of Canterbury and C Wade, BRANZ, New Zealand</i> .....	1333
<b>IGNITION AND EXTINCTION</b>	
Emerging risks from smouldering fires: Initial results from the EMRIS Project <i>Dan Madsen, B Husted, Lund University, Sweden, C Wanke, U Krause, Otto-von-Guericke-University, Germany, R Mikalsen, Stord/Haugesund University College / SP Fire Research, I Haraldseid, E Villacorta, G Kleppe, B Hagen, V Frette, Stord/Haugesund College, Norway</i> .....	1345
Modelling of self-heating behaviour during storage of torrefied biomass fuel <i>Tengku Noor Tg Azhar, Y Wu, University of Sheffield, UK</i> .....	1357
Experimental assessment of bench-scale ignitability parameters <i>Frida Vermina Lundström, Lund University, Sweden / DBI, Denmark and P van Hees, Lund University, Sweden</i> .....	1369
Auto-extinction of engineered timber: The application of Firepoint Theory <i>Alastair Bartlett, R Hadden, L Bisby, The University of Edinburgh, B Lane, Arup, UK</i> .....	1381
<b>FIRE DYNAMICS</b>	
Modeling of flame to surface heat feedback from laminar wall fires <i>Isaac Leventon, S Stolarov, University of Maryland, USA</i> .....	1393
Radiative characteristics of fires with different sooting propensities <i>Dong Zeng, M Chaos, Y Wang, FM Global, USA</i> .....	1405
Numerical prediction of liquid pool fires burning rate with a CFD approach <i>Siaka Dembele, M Alam, Kingston University London, V Madhav Rao, J Wen, University of Warwick, UK</i> .....	1415
An experimental study of water transport on vertical paper surfaces for sprinkler protection <i>Xiangyang Zhou, FM Global, USA</i> .....	1427

Intermediate-scale controlled-atmosphere calorimeter CADUCEE <i>Mickaël Coutin, IRSN, D Alibert, B Porterie, AMU, France</i> .....	1433
---	------

The effect of reduced oxygen concentration environments on material fire performance for hypoxic air venting systems <i>John Barton, P van Hees, Lund University, Sweden</i> .....	1445
---	------

The flammability of smoke in under-ventilated compartment fires <i>Sahand Rasoulipour, C Fleischmann, M Spearpoint, University of Canterbury, New Zealand</i> .....	1455
--	------

## **COMPOSITES**

Composites in fire: Intermediate-scale testing of sandwich panels and shells <i>Bernhard Schartel, S Timme, A Hörold, V Trappe, M Korzen, BAM, Germany</i> .....	1465
---	------

Analysis of delamination onset and growth induced by laser decomposition within carbon/epoxy composite laminates <i>Gillian Leplat, C Huchette, A Mavel, P Nunez, ONERA, France</i> .....	1471
--	------

Modeling anisotropic effects of carbon fiber reinforced epoxy composites In fire environments <i>Adrian Kopacz, R Bozinowski, J Hewson, A Dodd, A Brown, Sandia National Labs, USA</i> .....	1481
---	------

Virtual fire resistance furnace: Heat transfer predictions of a composite panel <i>Gilda Auguin, V Dréan, Efectis, France</i> .....	1491
--	------

## **THERMAL INSULATION & FIBRES**

Fire safe use of polyurethane insulation in hall buildings <i>Tuula Hakkarainen, M Nissilä, T Ojanen, VTT, Finland</i> .....	1499
---	------

Fire performance of plasterboard-insulation assemblies consisting of closed-cell charring insulation materials <i>Juan Hidalgo, S Welch, University of Edinburgh, UK and J Torero, University of Queensland, Australia</i> .....	1507
---	------

On the contribution of foam plastic insulation to life safety in residential building fires <i>Marc Janssens, A Joyce, SwRI, USA</i> .....	1519
---	------

Natural plant fiber flammability: A microcombustion calorimetry survey <i>Alexander Morgan, University of Dayton, USA and R Horrocks, University of Bolton, UK</i> .....	1529
---	------

## **ELECTRICAL FIRES**

Energetics of lithium ion battery failure <i>Richard Lyon, R Walters, FAA, USA</i> .....	1541
---	------

Thermally-induced failure of lithium ion batteries: Experimental investigation and modeling <i>Stanislav Stoliarov, X Liu, University of Maryland, USA</i> .....	1551
---	------

Fire spreading from a real open-doors electrical cabinet to overhead multiple cable trays into a confined and mechanically-ventilated facility <i>Pascal Zavaleta, L Audouin, IRSN, France</i> .....	1563
---	------

## HUMAN BEHAVIOUR

An experiment on ascending evacuation on a long, stationary escalator <i>Silvia Arias, E Ronchi, K Kuklane, A Halder, Lund University, J Noren, Briab Brand &amp; Riskingenjorena, M Delin, DeBrand Sverige, K Fridolf, WSP Sverige, Sweden</i> .....	1575
Individual and group response behaviours during evacuation of a public house <i>Nigel McConnell, K Boyce, Ulster University, UK</i> .....	1587
An analysis of human flow composition in various types of buildings <i>Dmitry Samoshin, Academy of State Fire Service, Russia</i> .....	1599
Relationship between specific flow and opening width considering pedestrian shoulder twist <i>Mineko Imanishi, T Sano, Waseda University, Y Omiya, Tokyo University of Science, Japan</i> ..	1609
Modification of interaction force between smoke and evacuee <i>Sungryong Bae, H S Ryou, Chung-Ang University, J-H Choi, Pukyong National University, South Korea</i> .....	1621
Variation of walking speed and decision-making time at various junctions <i>Young-Hoon Bae, W-H Hong, Kyungpook National University, S-H Lee, National Fire Service Academy, R-S Oh, S-N Baek, J-H Choi, Pukyong National University, South Korea</i> ...	1631
Development of flow model in staircase by considering mechanism of flow stop by congestion with people <i>Masayuki Mizuno, H Sendo, N Tanaka, A Sekizawa, Tokyo University of Science, H Kadokura, Tokyo Research Inst Inc., K Fujii, National Research Inst of Fire and Disaster, T Sano, Waseda University, Japan</i> .....	1641
Urban scale evacuation simulation using buildingEXODUS <i>Nitish Chooramun, University of Mauritius, Mauritius and P Lawrence, E Galea, University of Greenwich, UK</i> .....	1645
Pros and cons of egress drills <i>Steve Gwynne, NRCC, A Robbins, Jensen Hughes, Canada, K Boyce, University of Ulster, UK, E Kuligowski, NIST, USA, D Nilsson, Lund University, Sweden and R.Lovreglio, Politecnico di Bari, Italy</i> .....	1657
Representing egress data for engineers <i>Karen Boyce, University of Ulster, UK and S Gwynne, NRCC, Canada</i> .....	1671
A proposed framework for managing evacuation model uncertainty considering verification and validation <i>Tim Roberts, N Swailes, M Kinsey, G Walker, Arup, UK</i> .....	1683
